

ANTONY GORMLEY

ANOTHER SINGULARITY, GALLERI ANDERSSON SANDSTRÖM, UMEA, SWEDEN, 2008

12 April - 25 May 2008

This exhibition featured a new installation work, *ANOTHER SINGULARITY* (2008), alongside eight independent sculptures.

Speaking about this installation, Gormley has said:

'*ANOTHER SINGULARITY* is a body-matrix made from rope, held in place by bungees and ropes. The title comes from a cosmological moment of origination. The big bang is a singularity. All of my work deals with bodies in space and the space within a body. The work is a drawing. The space in the room is part of the material of the work. The work waits to be entered.'
